

HOW TO USE THIS WORKBOOK

"When you don't dress like
everyone else, You don't have to
think like everyone else."

This workbook is to be used at your own pace or in a classroom setting to work through how to make your own handmade wardrobe. We will start with a basic box top and then will continue to grow and expand your knowledge and skills with each new garment. With this workbook, along with supporting video tutorials, you will learn how to read a pattern, all about fabrics, tools, notions and tips for making a garment suited to you and your own unique shape and style. The goal is that with each new pattern, you will build on what you previously learned and grow your confidence and skills in making garments.
